Your hydration kit

Adjustable SULYVA 5 L vest - running, trail running, hiking and cycling

1. Kit contents

- 1 adjustable 5 L hydration vest.
- 1 hydration reservoir, 1.5 L, with hose and mouthpiece.
- 1 soft flask, 500 ml.
- 2 cleaning brushes: one for the containers and one thin brush for the hose.

Please note: 5 L is the vest's storage volume. The reservoir and soft flask together hold 2 L of water.

Fitting and use

Prepare the accessories, check the closures, then adjust the vest.

2. Adjusting the vest

1. Put on the vest like a backpack, with the main compartment at the back.

2. Fasten the three front straps. Adjust them evenly for a stable fit without restricting your breathing.

3. Place your belongings in suitable pockets and distribute the load. Close the zipped pockets.

4. Walk a few steps and check the fit. Readjust if the vest moves.

3. Preparing the 1.5 L reservoir

1. Before first use, clean the reservoir, hose and mouthpiece, then rinse with drinking water.

2. Remove the sliding top closure and open the reservoir. Fill with cold or room-temperature drinking water, up to 1.5 L.

3. Fold the opening correctly, then slide the closure fully into place.

4. If the hose is disconnected, insert its fitting into the reservoir connector until it engages. Check that it is secure and does not leak.

5. Place the reservoir in the designated rear compartment. Route the hose towards the front without pinching it or letting it dangle.

6. Remove the mouthpiece cover if fitted. Open the flow control, then drink through the mouthpiece. Close it after use.

4. Using the 500 ml soft flask

1. Clean and rinse the flask before first use. Unscrew the cap and fill up to 500 ml.

2. Screw the cap back on and check for leaks. Place the flask in a suitable front pocket.

3. Remove the protective cover if fitted. Pull the mouthpiece up to drink, then push it down to close.

Cleaning and storage

Clean, rinse, dry completely, then store.

5. Caring for the hydration system

• **After each use:** empty the reservoir and flask. Hand-wash them with water and a little mild washing-up liquid, then rinse thoroughly.

• **Container brush:** gently clean inside the reservoir and flask without scraping or using force.

• **Thin hose brush:** detach the hose at its quick-release fitting. Pass the brush through the hose without forcing it, then rinse the hose and mouthpiece.

• **Drying:** leave the reservoir and flask open, with caps removed, until completely dry. Also dry the hose, mouthpiece and brushes.

• **Storage:** keep the accessories clean and dry, away from heat and sunlight. Do not leave liquid in the containers between outings.

6. Caring for the vest

Remove the accessories and empty all pockets. Prefer hand-washing with water and mild soap, following the care label. Rinse and air-dry away from direct heat.

Advice and information

Check your equipment before every outing.

7. Precautions for use

• Check the seams, straps, closures, fittings and mouthpieces. Do not use an accessory that is damaged or leaking.

• Use cold or room-temperature drinking water. Do not use very hot liquids or carbonated drinks.

• Do not overload the vest. Avoid placing sharp objects against the reservoir or flask.

• Reflective strips help improve visibility; they do not guarantee that you will be seen. Adapt your equipment to traffic and lighting conditions.

• Do not adjust or handle accessories if this distracts you from your route; stop if necessary.

• Suffocation risk: keep the plastic packaging bag away from babies and children. This bag is not a toy. After unpacking, dispose of it according to local sorting rules, without leaving it within children's reach.

8. Kit specifications

Item	Specification
Vest	Storage volume: 5 L
Vest weight only	Approximately 220 g, empty
Adjustment	3 adjustable front straps
Pockets	4 front pockets and 1 zipped rear compartment
Hydration	1.5 L reservoir + 500 ml soft flask
Comfort / visibility	Breathable mesh and reflective strips
Cleaning	2 brushes included

9. Frequently asked questions

Is the vest suitable for women and men?
Yes, the fit is unisex. Check that the adjustments provide a suitable fit for your body shape.

Can I use only the reservoir or the flask?
Yes. Adapt the contents of the vest to your outing and adjust the straps after loading.

What should I do if there is a leak?
Check the cap, closure and fitting. If the leak continues, stop using the accessory and contact the seller.

Support: contact the seller through your Amazon order, quoting your order number and the accessory concerned.
